

# FCleaner Quick Tour

Here is a quick tour and guide for you to start using FCleaner on your Windows. FCleaner now supports Windows 9x, Me, 2000, XP, 2003, Vista and Windows 7. Please make sure your hard disk have 3 to 5 MB free disk space for FCleaner installation.

## Download & Install

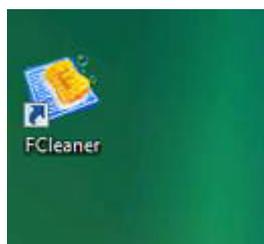

[Download FCleaner](#) at first, then double click the setup file to run it (usually its name is fcleaner.exe). You will see the following screen.

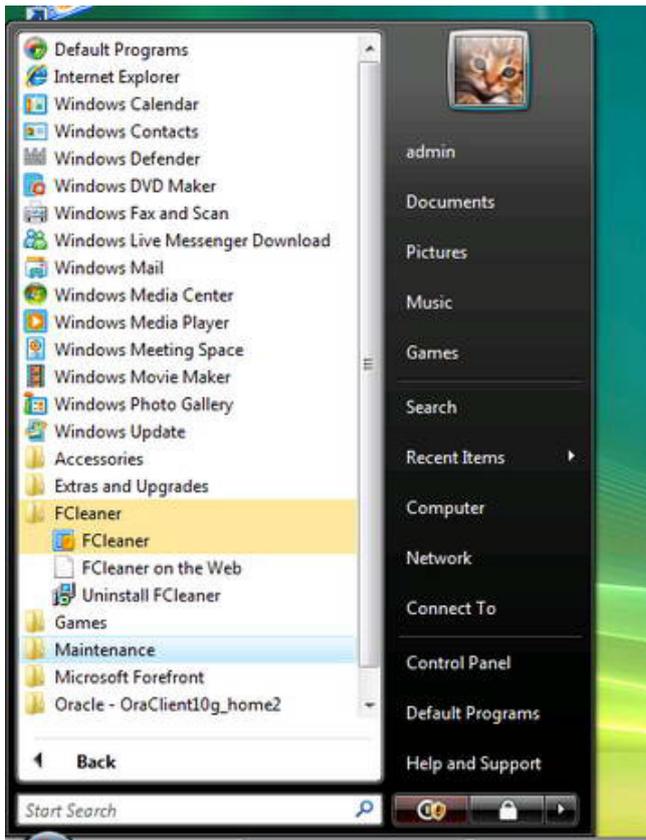

Click 'Next' and follow the guide on the setup file to install FCleaner on your Windows.

## Start & Use

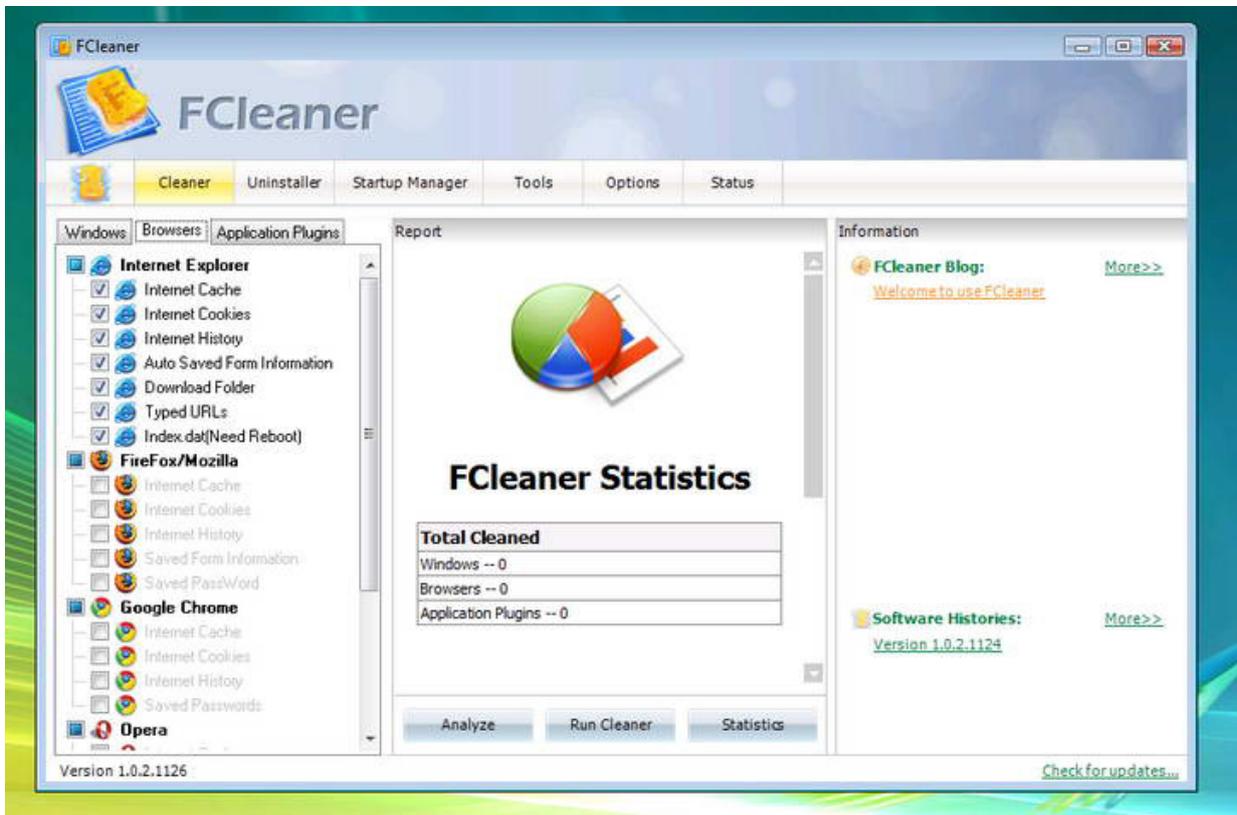

After the installation process is done, you will see FCleaner's icon on your desktop.

If you cannot find it on your desktop, you can find it on Start Menu.

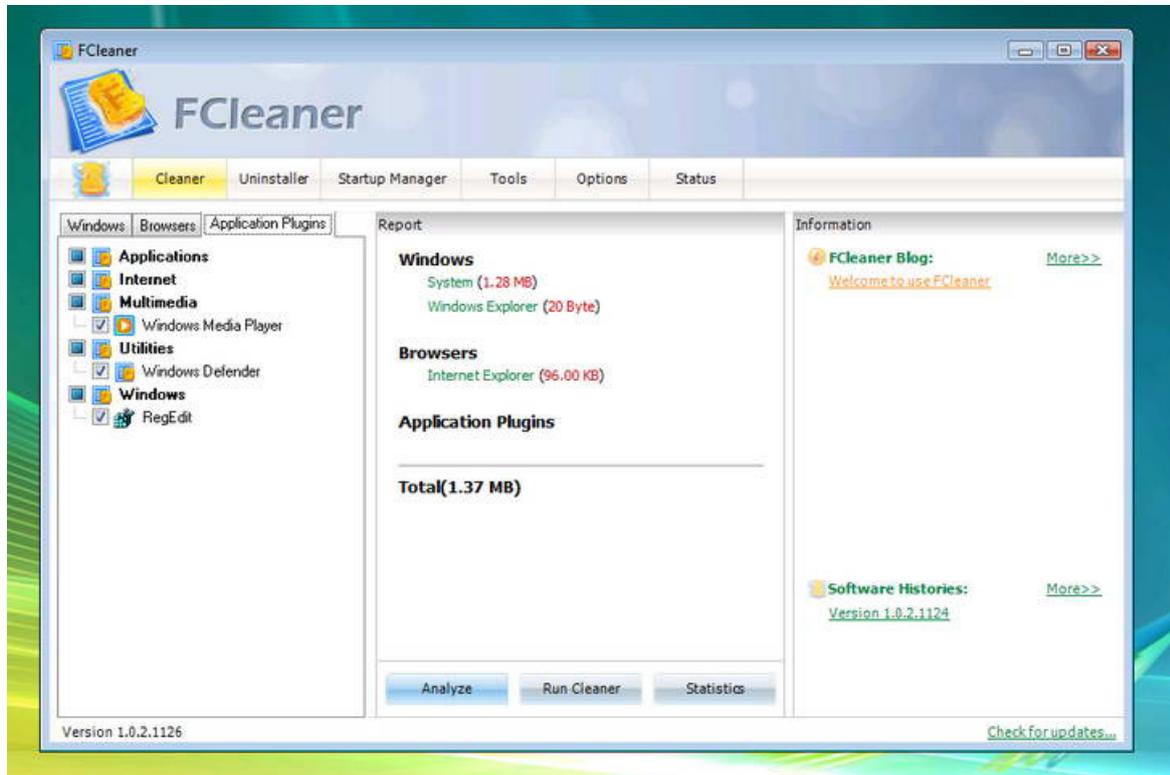

Click the icon to start FCleaner. You will see FCleaner main interface like below.

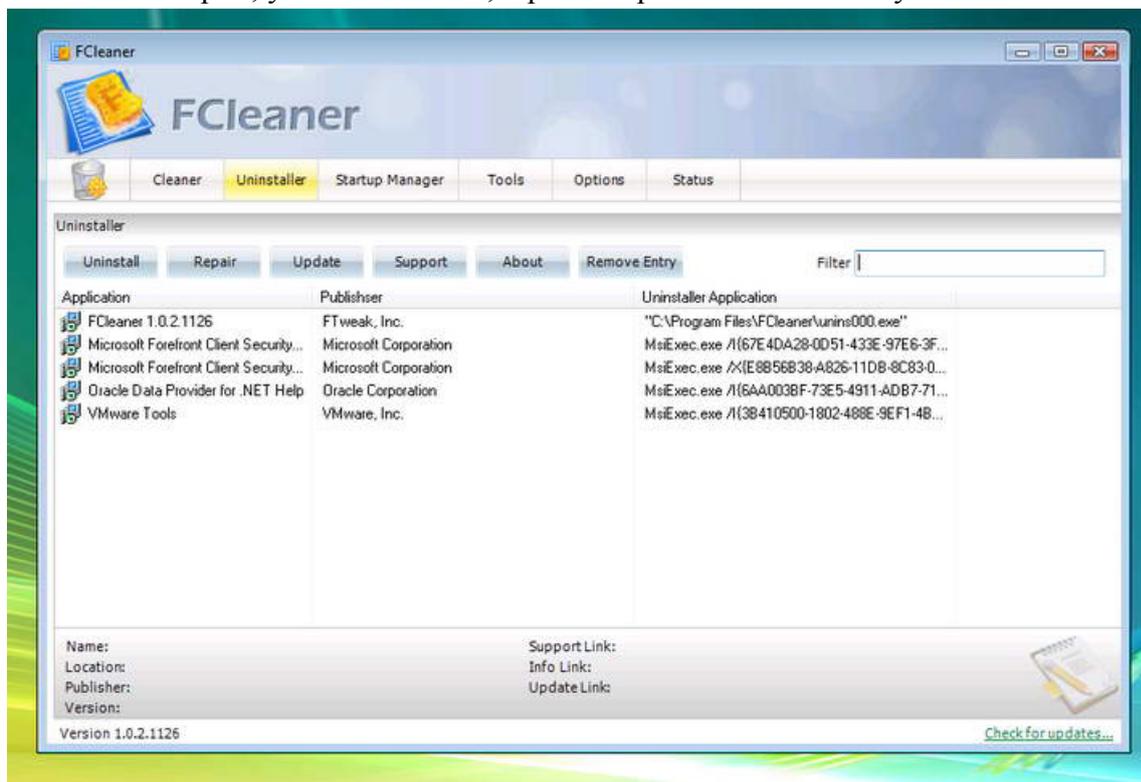

Now you can use FCleaner to clean your Windows.

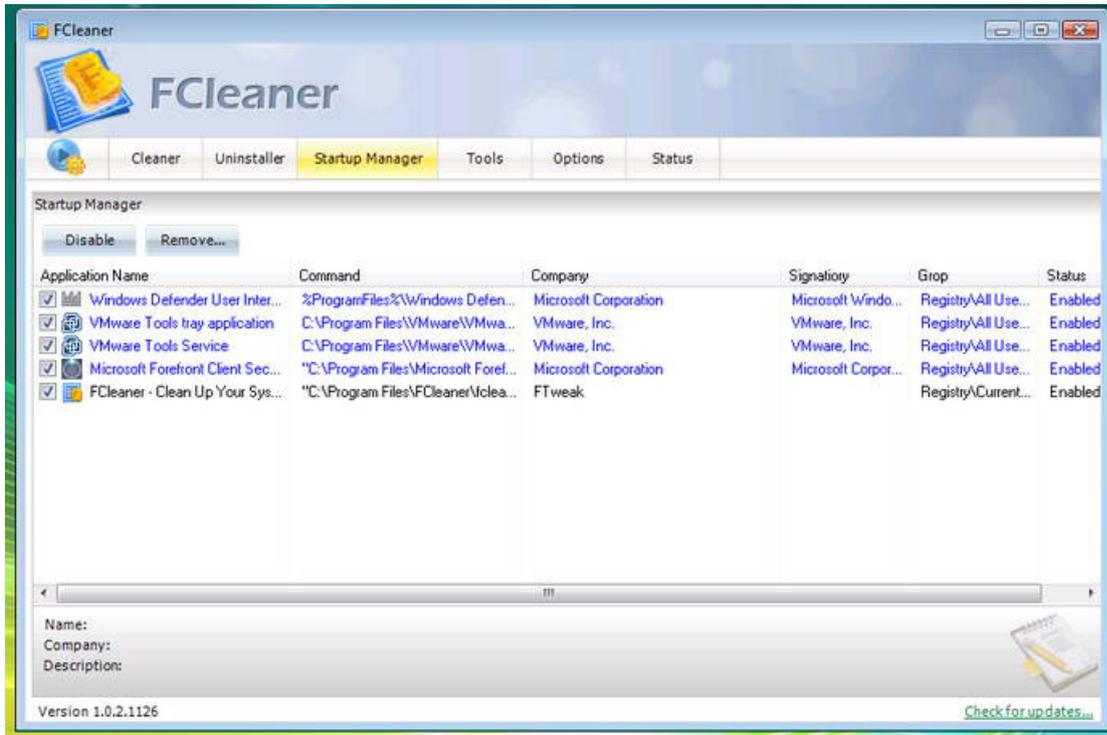

In 'Cleaner' part, you can check(uncheck) the elements you want(don't want) to clean on the left panel. Then click 'Analyze' button to analyze the unused files. Or just click 'Run Cleaner' button to do analyze and clean together.

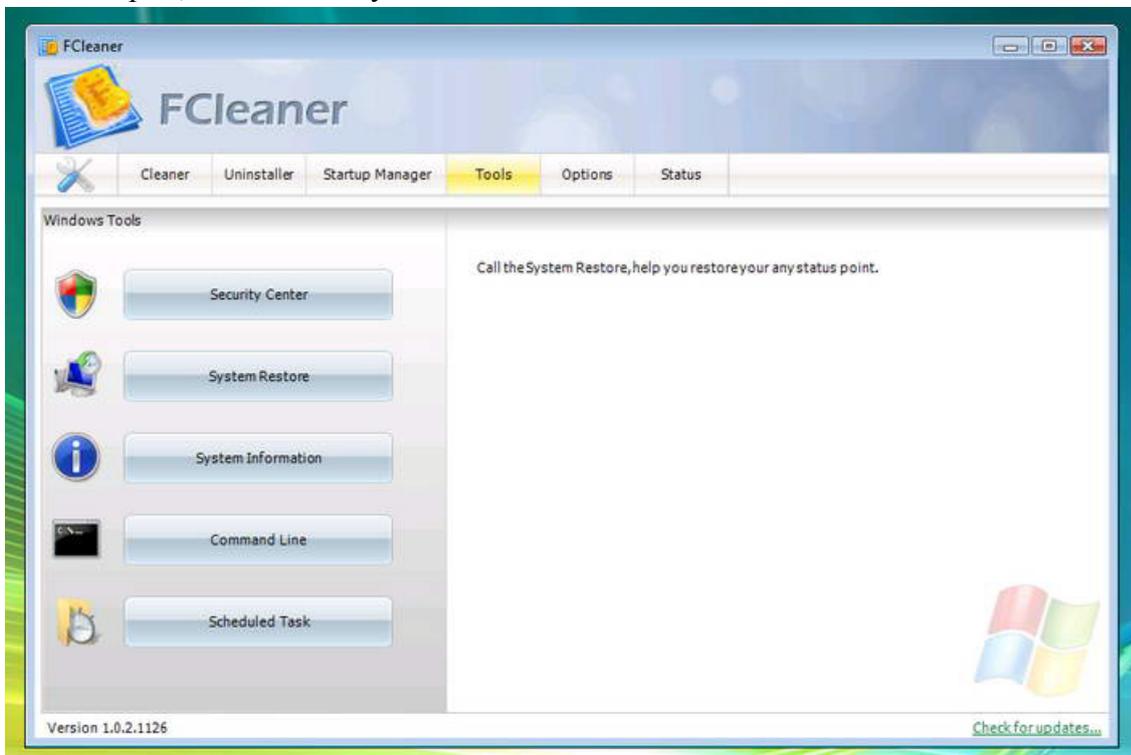

In 'Uninstaller' part, you can uninstall, repair or update the softwares you have installed.

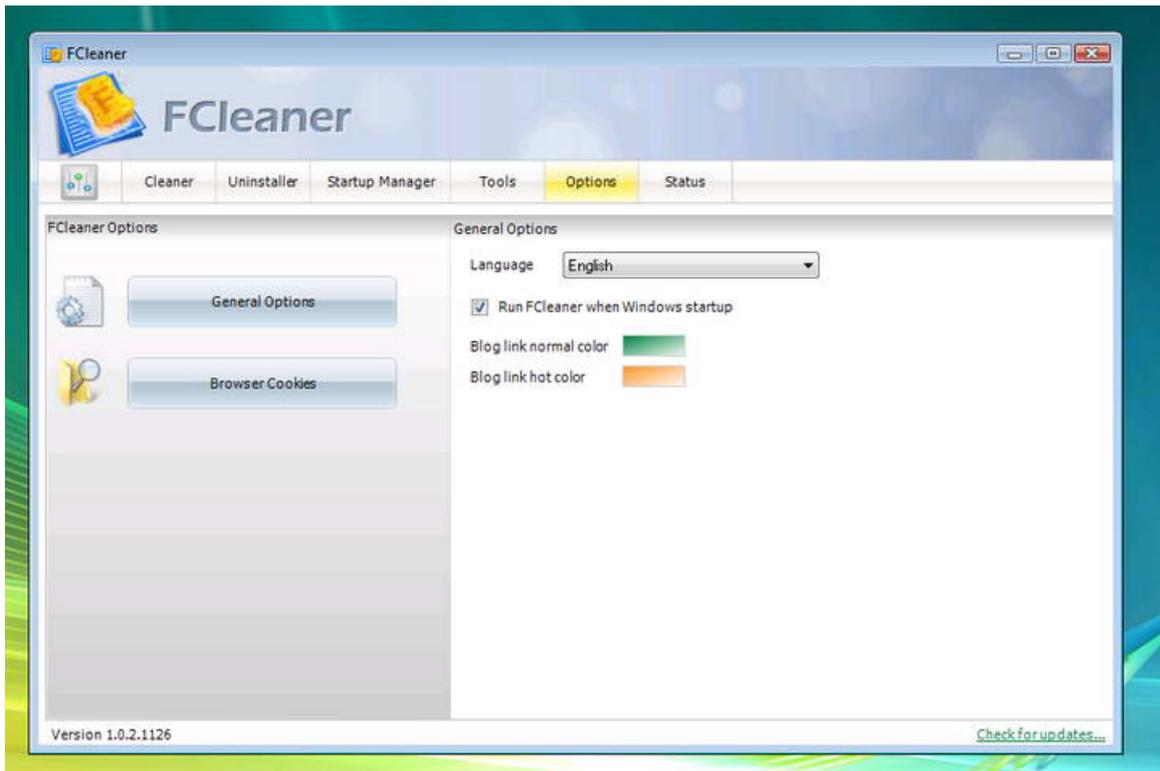

In 'Startup Manager', you can disable or remove the entry of the applications that run when Windows startup.

In 'Tools' part, some useful system tools can be found.

In 'Options' part, you can change the language, set the text colors, or view cookies ...

In 'About' part, you can see the about information of FCleaner, and your cleaning statistics information. If you have donated FCleaner, your name will also be displayed here.
